Achievement

Devops Project using Git and deployed using Jenkins through CI/CD

We have created Amazon EC2 instance for the development and
we installed Jenkins and tomcat over the instance then using the
git repository we fetch the html file and deployed it through Jenkins
using the public IP addresses.

**Devops project using Git, Ansible, Tomcat server and Jenkins**

We have created 2 instances with ansible and tomcat installed on
it and then we made a connection between server and client node
which is deployed through Jenkins

Devops project using Git, Jenkins and Docker

We have created the instance and install docker over it and deploy
the containers using Jenkins.
